For Psychiatric Inpatient Hospitalization service, rates vary by hospital. A temporary increase of 20% was applied to all contracts from 7/1/20 through 1/31/21. A 5% increase was applied to State contracts from 2/1/21 through 6/30/21, and a 5% increase was applied to Medicaid contracts tentatively from 2/1/21 through 6/30/22. These are in addition to the permanent 5% increase that was applied on 7/1/20.

***Old rate X 1.15 = new rate. Always round up if 3rd decimal is 5 or more and round down for less than 5.
 For Example: If the current rate is \$201.00 per day and there is a 15% increase, the new rate would be calculated as: 201.00 * 1.15 = 231.15**

EVV services were increased by 10% on 2/1/2022. The increase affects the underlying base rate only; the COVID enhancement remains static. E.g., If H0000 is \$100 and H0000CR is \$115, H0000 and H0000CR will become \$110 and \$125 respectively, not \$110 and \$126.50.
