**Date:** April 11, 2022  
**Subject:** Change in State Funded Benefit Plan

---

In February 2022, Trillium Health Resources enhanced state funded benefits by adding Community Living and Support (CLS) (IDD and TBI) YM 851 Individual and YM 852 Group to our State Funded Benefit array. Effective, April 11, 2022 Trillium will begin allowing new admissions to CLS only for members who are aging out of Developmental Therapy. Medical necessity must be met for the member to be eligible to receive CLS. The benefit remains closed to all other new admissions.

As of May 1, 2022, Trillium will reinstate new admissions to state funded benefits **with the exception of state funded CLS**. Prior authorizations will be needed as prescribed by clinical coverage policies and Trillium's state funded benefit plan. <https://www.trilliumhealthresources.org/providers/benefit-plans-service-definitions>
