

EVIDENCE-BASED NARCOTIC PRESCRIBING

March 27, 2018
Beechwood Country Club
205 Country Club Road, Ahoskie, NC 27910
6:00 p.m. - 8:30 p.m.

Michael Lang MD, FACP, DFAPA
Clinical Associate Professor, Departments of Psychiatry and Internal Medicine
Program Director, Internal Medicine/Psychiatry Residency Program
Director- Electroconvulsive Therapy and Transcranial Magnetic Stimulation Programs

OBJECTIVES: Upon completion of this knowledge-based program the participant should be able to integrate into practice new developments in the following areas:

- 1. Tackling the Prescription Drug Problem in Your Practice: An Outline for Evidence-Based Narcotic Prescribing**
 - Review the statistics for prescription drug use and overdose in the US
 - Explain the psychological basis for drug seeking behaviors
 - Provide an algorithm for appropriate safety based opiate prescribing
 - Discuss some common opiate prescribing challenges in practice
- 2. Alternative Therapy for Chronic Pain Management**
 - Evaluate non-opiate pharmacologic agents for use in chronic pain
 - Introduce clinical health psychology as viable treatment options
 - Discuss effectiveness and indications for specialized interventions: topical agents, physical medicine, mechanical interventions
