

For (B)(3) Services - In House Skill Building, Intensive Recovery Support & Transitional Living Skills

Questions & Answers

1. Where are the full service definitions for each service, as adopted and presented specifically by Trillium Health Resources, on the MCO website?

These services are in addition to and are not a duplication of other services under the State plan 1915(b)(3). The service definitions will be posted to the Trillium Health Resources website upon award.

2. What population does In Home Skill Building serve?

Members with intellectual developmental disability (IDD) diagnoses having three or more functional deficits and needing behavior support and signification habilitation needs as documented through a functional assessment. This is for ages 3 and up.

3. What is the age of Transitional Living consumers?

Children from the age of 16-21 with an Axis 1 diagnosis and at least one deficit in an IADL and a CALOCUS Level 1 or greater; or a LOCUS Level 1 or greater or ASAM level 1 or greater.

4. In the "Individual Recovery Services" are the children covered under the service?

Intensive Recovery Support is a service designed for women age 18+ with children that are discharged from SA treatment programs. This service is intended for women with children that are discharged from SA treatment programs.
