

PROVIDERS:

Prior to the launch of Medicaid Expansion and the Tailored Plan, Trillium Health Resources wants to ensure that people who have mental health, intellectual/developmental disabilities, or substance use issues have access to quality healthcare. These surveys focus on the healthcare needs of the Trillium members and service area. Your response will help us understand the medical needs of the people in our network and help us to ensure that Trillium can respond more effectively to those healthcare needs. Surveys will need to be completed no later than **November 30, 2023**.

Thank you for your input.
